

DRAGONS BREATH

Solar street lighting systems

Dragons Breath can help with any Path, Car Park, or minor Road Lighting needs. We can provide solar powered lighting systems developed specifically to suit any location. Be that retro fit or new build. As energy efficiency becomes more stringent in the future. We are being swayed towards this sort of peripheral technology, which helps to combat the need for mains power and as such helps to reduce localised carbon footprints.

Dragons Breath solar street light systems

All options can be manufactured and designed to match customer's specification
