

Forget about trenching mains cables.

With our bespoke solar powered street lighting systems you can provide illumination for un-adopted areas.

Ideal for roads, car parks, path ways, housing estates, bridle paths, equestrian ménages, farms, driveways, schools, community areas, grounds, parks, allotments, moorings and quays.

We specialize in engineered solutions developed through research & development.

Value added environmentally friendly low carbon footprint

Zero light pollution & emissions

Maintenance free

Tamper proof fashionable designs

Turn-key products suitable for town and rural locations

Timed operations to assist control facility

Top of column mounted battery storage reduces vandalism or risk of flooding

Safe low voltage systems

Up to 5 years warranty is available on mechanical parts LED's & solar panels.

We can set any lighting to correspond with PIR or timed each evening.

LED chip sets are available in 3-30w outputs, suited to locations that can provide high quality irradiance.

Dragons Breath® is a long established professional knowledge based company specialising in battery storage solutions. Offering UK designed lighting. Columns or posts 3-5m lengths are available in steel or aluminium to suit the application. Our team can match one of our products to meet with your requirements supplied for self installation. Optional installation design & consultancy services are available on request. Please contact us for any information regarding your project by email.
