

DRAGONS BREATH SOLAR

DBS Precinct solar powered lighting system

The Dragons Breath Solar precinct lighting system can be either a sophisticated walkway lighting system for inner cities. This can be used in any location where illumination earned by the using the Sun is paramount.

Designed for locations where power is not readily available but can also be used to provide a more modern way of illumination locations looking towards a carbon neutral policy. The units are extremely robust and come with a full 5-year warranty. The solar panel alignment allows the user to choose which best match location requirements. Power is then fed into P.b Gel battery sets, these are encased behind the solar panel. Inside the mounting framework out of sight. The LED lighting is positioned to stretch around the circumference of the units, allowing either 180 degree or 360 degree spread of light to illuminate large area immediately underneath lamp post. Solar panel/battery box need to be positioned due south. These can be installed onto new 101mm suitable columns.

Precinct solar lighting system is self-managing and ideal for open public areas. It stands on top of a high elegant column and shines light in a 360-degree circumference offering full luminaries' power of 30w which can be illuminated by a motion sensor that can detect pedestrians or bicycles. The renewable source makes it a winner for any path lighting.

- Colour temperature 4500k
- Luminous flux 2400lm
- Minimum CRI:70
- Systems colours are available in White/Grey or all black.

Each product has 5 years warranty
