DBS150-170 pre assembled range one piece & two part lithium solar lights

[DBS155](#)

DBS155 Li 76mm column/post fixing | Power generation upto 780lm
deep cycle LiFePo4 battery = 1-2 days autonomy when fully charged by sun

[DBS161](#)

DBS161B60 Li all terrain 76-89mm clamp on post fixing | Power generation upto 960lm

DBS161B70 Li all terrain 76-89mm clamp on post fixing | Power generation upto 1280lm

DBS161B80 Li all terrain 76-89mm clamp on post fixing | Power generation upto 1600lm

All with deep cycle LiFePo4 battery = 2-3 days autonomy when fully charged by sun

[DBS165](#)

DBS165M80 Standard pre assembled multi-directional (76-89mm column fixing) | power generation 1360lm

DBS165M115 High performance pre assembled multi-directional (76-89mm column fixing) | power generation 1700lm

deep cycle LiFePo4 battery = 2-3 days autonomy when fully charged by sun

Multi-directional 2 part lights can be placed at any location

[DBS167](#)

DBS167C80 Li clamp on type 76-89mm | Large power generation upto 1800lm

DBS167C90 Li clamp on type 76-89mm | Large power generation upto 2025lm

large deep cycle LiFePo4 battery = 5 days autonomy when fully charged by sun

[DBS170](#)

DBS170D Slot on one piece lithium powered (fixed over top of 89mm column)

DBS180D Slot on one piece lithium powered (fixed over top of 89mm column)

deep cycle LiFePo4 battery = 2-3 days autonomy when fully charged by sun

[DBS168](#)

DBS168C Special one piece sd security camera light unit (fixed onto 76mm column) 80w power generation

[DBS Bollard](#)

DBSbollard pre assembled bollard lights (260mm dia x 360mm high)

DBSbollard pre assembled bollard lights (260mm dia x 600mm high)

DBSbollard pre assembled bollard lights (260mm dia x 900mm high)

Optional extras

£85.00 60mm straight galvanized post

£105.00 76mm straight galvanized post

£145.00 89mm straight galvanised post

£14.50 89mm cement base plate

£74.00 76mm anti-climb spike

£79.00 89mm anti-climb spike
